Script Store Performance Dashboard

Synthetic dataset | Sep 2025–Oct 8, 2026 | Revenue and contribution are modeled estimates

Total Sessions	Total Estimated Revenue	Total Estimated Contribution	Scripts Opened
416	$280,352	$195,440	136

Key Insights

- Monthly session volume peaked at 66 sessions in August 2026.
- City-limited and exclusive scripts generated higher average contribution per session than boxed scripts.
- High-frequency, high-contribution scripts should be prioritized for scheduling and customer promotion.

Synthetic growth scenario for portfolio demonstration; not a claim of actual business impact.

Data Limitations

- Revenue is estimated because membership discounts and actual transaction amounts were unavailable.
- Contribution excludes rent, utilities, taxes, and other operating expenses; it is not net profit.
- Script acquisition costs are scenario-based estimates rather than verified purchase prices.
- October 2026 is a partial month and should not be directly compared with complete months.
